## 1 Establishing the RAP

This document aims to identify a primary research question and position this question in the literature.

To this end, we establish a RAP made of three components:

- R: the research question
- A: the answer to primary research question
- P: the position of this research question + answer in the literature

The following sections establish this conceptual framework.

### 1.1 R: What is the research question?

1.2 A: What do we provide (in terms of analysis)?

1.3 P: Where is this work positioned in the literature?

1.4 How does P make space for R?

1.5 How does P idly lead readers to A?

## 1.6 How does $A$ answer $R$ ?

## 2 Conceptual Framework

## 3 Empirical Approach

### 3.1 Data

### 3.2 Econometric Strategy
